

# Solenoids

Nitrous Express only uses the highest quality, made in the USA, solenoids on its systems. Don't be fooled by low price come-ons, the solenoids are the most important component of a nitrous system. The next time you are tempted by a cheap solenoid ask yourself if it has:

- A limited lifetime warranty
- A guarantee to outflow any comparable solenoid.
- A 100% aluminum body, and a proprietary seat material that resists leakage even when damaged by foreign debris.
- Lightweight Carbon Fiber solenoid cans to complete the package making it the lightest solenoid ever manufactured.
- The NX exclusive design that allows a flow through purge to give a 100% pure nitrous charge at the solenoid orifice. This insures the hardest hit in the industry!
- Built in fuel bypass port in the fuel solenoid.
- The quickest off the seat reaction time of any solenoid made today
- True orifice sizes, NX solenoids have the largest true orifice sizes in the industry
- Available alcohol compatible seat materials
- Heavy 14 gauge color coded wires
- Epoxy encapsulated coils

When only the best will do it had better be Nitrous Express!
