

### Jet Selection Chart

Using the chart below locate your car's year, make, and model. Select the desired horsepower level to determine the nitrous and fuel jet requirements i.e. If you own a 1994 Acura Integra 1.8L and want a 50 HP boost you would use a 35 Nitrous and a 20 Fuel jet. If your car is not listed, contact the factory tech line.

#### Import Passenger Cars, Light Trucks & Vans

In stock engine applications and street usage the spark plugs should be at least 2 steps colder than stock. Do not use platinum tip, extended tip or any plug with multiple ground straps or split ground straps. When in doubt about heat range always go one step colder. Never use an extended tip plug in a racing engine.

FFP=Flowing Fuel Pressure
